### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because it is too length, and exceeds the maximum allowable length. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-33 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. The critical elements of embedding, manipulating and extracting electronic watermarks are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The invention described in the abstract of the disclosure, the field of the invention, the background of the disclosure, and the summary found on pages 1-8 all recite that the invention is germane to data processing systems wherein the systems are suited to use embedded electronic watermarks to protect digital data (pg. 1, lines 12-15 et seq.). Similarly, the description of the related art, recites that digital data is being protected by the use of copyright information that are embedded in image and sound data as electronic watermarks (pg. 1, lines 20-25 et seq.). Various methods are described in the related art whereby, electronic watermarks

Art Unit: 2134

technology is being used to protect and prevent illegal copying of protected information (pgs. 2-5). The summary then describes the embodiments necessary "...to efficiently protect copyrighted material in various electronic-watermarks methods..." (Pg. 5, lines 11-12). Objects are then recited that would effect the desired security of the electronic watermarks. Additionally, all of the figures in the disclosure recite the manipulation of the electronic watermarks to provide said security protection describe above, see figs 1-7A. The detailed description then continues with various embodiments of the invention while then reciting the necessity and manipulation of the electronic watermarks see entire disclosure. For the above mentioned rational, it is believed by the examiner, that the claims fail to contain an essential element necessary to carrying out and practicing the invention. A claim that omits an element which applicant describes as an essential or critical feature of the invention originally disclosed does not comply with the written description requirement. See MPEP 2163.05

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
